Chapter 1: Intro to revised CoPs	
CMS relaxes requirements during PHE.....	1
Final interpretive guidelines for the CoPs.....	2
Memo details tags, standards for revised CoPs.....	4
CMS clears up confusion on plan of care review.....	6
CMS addresses issue involving SOC dates.....	7
Do this to prepare based on final IGs.....	7
Use this checklist to comply with CoPs.....	9
History of CoP changes.....	12
CMS provides these definitions for the CoPs.....	13
CMS explains qualifications to be backup administrator.....	14
Tools	
Standards within the CoPs.....	15
Sample administrative binder for surveys.....	17
Chapter 2: The impact of surveys	
Temporary managers can be appointed after surveys.....	22
CMS offers training about survey process.....	22
Tips to conduct mock surveys.....	23
Beware immediate jeopardy situations.....	25
Past triggers for immediate jeopardy in home health.....	26
How to address deficiencies quickly.....	30
Chapter 3: Recent CMS survey results	
CMS website provides details about deficiencies.....	31
Provide patient-specific, measurable goals.....	33
Ensure patients' plans of care are individualized.....	34
Surveyors are targeting aide training, supervision.....	36
Review emergency prep — it's a top target on surveys.....	39
Survey results reveal patient rights as target areas.....	40
Ensure OASIS submission processes run smoothly.....	42
Review how your agency handles complaints.....	44
Chapter 4: Develop a QAPI program	
QAPI CoPs are organized into five standards.....	47
Costs associated with QAPI.....	48
Get ideas for where to focus your QAPI efforts.....	49
Three steps to set up a sound program.....	50
Agency finds success with falls QAPI project.....	52
View outcome reports before launching QAPI program.....	54
Get benefits from avoidable event audits.....	55
Improve on medication management in your PIP.....	56
How do you determine PIP report frequency?.....	57

Does CMS want agencies to format PIPs a certain way?	57
More tips to comply with the QAPI CoP	57
Prioritize areas for improvement, have next target ready.....	59
CoPs remove requirement for professional advisory group	60
Change roles to meet demands	61
Data analysis a key skill for quality managers	62
New quality managers should visit patients' homes.....	63
Other tips for training quality managers	64
Have clinical managers, case managers meet.....	64
Tools	
Sample QAPI Canvas.....	67
Sample PDSA Worksheet	68
Chapter 5: Reduce readmission rates	
Reduce hospitalizations for value-based success.....	70
Ways to reduce overall rehospitalization rates	70
Educate aides about how to keep patients out of hospitals.....	73
Rarely used nutrition assessment tool could help patients.....	74
Implement care paths to reduce rehospitalization rates	74
Determine problem areas to decrease hospitalization.....	75
Payment penalty group 1: Pneumonia	76
Ways to reduce readmissions for pneumonia patients.....	76
Ways to get pneumonia patients to use equipment.....	77
Heart patients overall.....	78
Payment penalty group 2: CHF	79
Tips to prevent CHF hospitalizations	79
Payment penalty group 3: AMI	80
Ways to keep AMI patients safe at home	80
Payment penalty group 4: COPD	81
Ways to reduce COPD readmissions.....	81
Detect flu early in COPD patients to minimize its impact.....	83
Payment penalty group 5: CABG	84
Payment penalty group 6: Hips and knees	85
Reduce rehospitalizations for hip, knee patients.....	86
Other ways QAPI can prevent rehospitalizations.....	87
Wound specialists can guide your wound QAPI project.....	87
Measure wounds with accuracy, consistency.....	89
Ways to assess your patients for fall risks.....	90
One agency discusses how to analyze fall risk	91
LIFT intervention is developed at HHS' behest	92
Five key tips to help prevent patients from falling.....	92
Influenza immunization for flu season	93
Pneumococcal vaccine ever received.....	97
Quality depression care can reduce rehospitalizations.....	98
Test for cognitive impairments, achieve better outcomes.....	98
Assess patients for post-hospital syndrome.....	99

Identify, mitigate post-hospital syndrome.....	100
Get staff buy-in about telehealth use.....	100
What to seek, pay for when it comes to telehealth nurses	101
Electronic clinical pathways improve outcomes.....	102
Tools	
High-risk hospitalization protocol.....	111
Hospitalization prevention tool.....	112
Home health agency process of care investigation	114
Emergency/education plan for heart failure.....	116
Heart failure program readmission worksheet.....	117
Patient/caregiver interview	118
Identified causes.....	120
Preventing pneumonia at home.....	121
My plan for preventing pneumonia at home.....	121
Depression screening tools	122
Hamilton Anxiety Rating Scale (HAM-A)	122
Chapter 6: Quality measures to improve	
Care Compare data frozen until 2022.....	125
5-star ratings	127
Quality of care star ratings	128
CMS to modify star ratings.....	129
5-star agencies reveal many of their best practices	129
HHCAHPS star ratings	131
Agencies identify HHCAHPS as their top QAPI project.....	132
8 tips to improve HHCAHPS response rates	135
Improve scheduling, call backs and see better results	136
Address caregiver stress, score better on HHCAHPS	137
Split treatment goals into smaller, discrete actions.....	139
Value-based purchasing.....	140
Value-based purchasing update	140
CMS finalizes changes to VBP for 2019.....	142
Attending doctors' visits helps with VBP improvement	142
A deep dive into data can help your agency stand out	143
Timely initiation of care.....	144
Pain interfering with activity	146
Dyspnea	147
Bathing	149
Transferring.....	154
Ambulation	155
Medication management/reconciliation	158
Chapter 7: Infection control	
Update infection control policies prior to surveys.....	167
COVID-19.....	169
Protect staff from COVID-19	169
Strengthen employee flu protocols as trial run for vaccine	170
Follow standard infection control precautions.....	171

Use CDC as your guide for infection control requirement	172
Educate your agency’s staff about infection control	172
Best practices for supervision of staff	173
Actions to show infection control improvements	174
Create an infection manager role	174
Make sure you track infection control data the right way	174
How to improve your infection control data	175
Agencies share how they track infection control data	175
Resources when creating a program	176
Survey agencies to report breaches	176
Handwashing	177
CMS removes language about most effective soap	177
Tips to perform proper handwashing	178
FDA: Soaps with certain ingredients can’t be marketed	179
Bloodborne pathogens	181
Educate clinicians about glucometer use	182
UTIs	183
How one agency reduced its UTIs	183
The flu	185
Collect, analyze staff flu vaccination data	185
Double down on prevention to protect patient outcomes	186
Ebola and Zika	189
Teach your fearful patients how to evade Zika	189
Develop intake screening protocols, prepare for Ebola	190
Superbugs	191
Precautions when CRE is suspected	191
Bedbugs	192
One agency’s anti-bedbug advice	192
What to do if you suspect bed bugs are in a home	193
Do this after clinicians come into contact with bedbugs	193
Proper clothing, equipment	193
Get dress codes right to reap infection control benefits	193
Agencies must ensure nurses keep clean nursing bags	194
Tools	
Sample infection control form for patients	195
Sample infection control form for employees	196
Infection control patient assessment form	197
Infection prevention risk assessment	199
Steps for to properly wash hands using soap	200
Steps for clinicians to properly use hand sanitizers	201
Chapter 8: Patient rights	
Do this to ensure patients properly receive their rights	207
Final guidelines change CMS’ written rights expectation	208
CMS tweaks language involving representatives	209

Train intake to gather more detail about patient rights	209
Patient rights revision checklist.....	211
CMS adds a standard: Written info	213
Create verification form to prevent survey citations.....	215
Note what final guidelines say about informed consent	216
Understand training needed for confidential records.....	216
Provide medical records quickly upon request	217
Comply with the records requirements	217
CMS considers tweaking medical record requirement.....	218
CMS offers surprising update on records retrieval	218
CMS changes verbal rights notification requirement	218
Communicate patient rights in various languages.....	220
What to do about patient choice, possible discrimination.....	223
Improve how to handle complaints.....	223
Create a grievance policy to handle complaints.....	224
Employees must report neglect, abuse they observe	225
What training should you provide on abuse/neglect?	225
Final guidelines offers definitions on abuse, neglect.....	225
Warning signs to point out to staff about neglect, abuse	226
Do the following if you discover theft at your agency	231
Tools	
Sample document to verify patients' rights were provided.....	234
Supplemental intake form for revised Home Health CoPs.....	236
Chapter 9: Planning, coordination & quality of care	
Ensure plan of care has necessary elements.....	239
What else must be in the clinical record?	240
How should the plan of care be updated?.....	241
Examine the content of the comprehensive assessment	242
Other major changes in care planning CoP	242
Use caution with physician-ordered ROC beyond 48 hours.....	245
Agencies must conduct psychosocial assessments	246
Comply with psychosocial assessment requirement.....	247
One-clinician rule expands collaboration on OASIS	247
How does the IMPACT Act play into this?	248
Act properly to discharge patients with cause	248
Do this before discharging patient for behavioral issues	249
Discharge or transfer summary content.....	252
Components of a successful discharge.....	252
Must you notify doctors of transfer/discharge in writing?.....	253
Care coordination involving aides	253
CMS finalizes change involving aides to reduce burden.....	254
Enhance collaboration under one-clinician rule.....	259
Keep your care team informed with encrypted emails	260
Update coordination of care, plan of care practices.....	260
Use these best practices for care coordination.....	261
Improve your agency's case conferences.....	262
CoP changes also affect subunits, "branch office"	264

Work as a team to improve patients' pain levels	264
Care planning was the top condition-level deficiency in 2019	266
Hardest revised CoPs to comply with	268
Chapter 10: Emergency preparedness	
Changes to emergency preparedness requirements	269
Guidelines show what surveyors will focus efforts on	273
More things to consider during emergency prep efforts	275
Final rule seeks to lessen burden of requirement	275
Emergency preparedness hard for agencies to comply with	276
Study up on online training for emergency prep	277
Perform a risk assessment — or risk citations	277
Individual emergency prep plans are a key new item	279
CMS addressed concerns following proposed rule	280
CMS: Conduct emergency prep training exercises	283
Bolster preparedness with CDC's planning guide	284
Act now to prevent supply issues during emergencies	285
Emergency prep tips — regardless of the emergency	285
Screening tool helps define patient risk in emergencies	286
Rank your agency's patients in order of priority	287
In case of disasters, Google calendars assure good care	287
Make sure to sign up for GETS	288
Prepare your agency for a grid outage	289
Here's how to prepare for a massive snowstorm	290
A hurricane predicted? Don't procrastinate	291
Flood forces agency leaders to assume new rules	293
Add active shooter preparations to disaster plans	293
Boston-area agencies share tips in the wake of bombings	294
Ensure clinicians are knowledgeable about fire safety	295
Be aware of cybersecurity obligations in the CoPs	296
Tools	
Sample emergency management plan	302
