About the author xi

Chapter 1: The survey process 1

Who conducts surveys? 1
Size of the survey team 1
Types of surveys 2
Frequency of surveys 4
Understand tier levels 5
Deciphering the State Operations Manual 5
Survey processes 6

Chapter 2: Intermediate survey sanctions 9

CMS goals/expectations for sanctions 9
Sanctions for agencies with deemed status 10
What is a branch? 10
What factors are considered in determining sanctions? 11
Action taken when immediate jeopardy is found 12
When condition-level citations are non-IJ situations 12
Informal dispute resolution (§488.745) 12
Repeat deficiency 14
Sanction No. 1: Temporary managers (§488.835) 14
Sanction No. 2: Payment suspension for new admissions (§488.840) 16
Sanction No. 3: Civil money penalties 17
Sanction No. 4: Directed plan of correction 20
Sanction No. 5: Directed in-service training 20
Summary 21

Chapter 3: Immediate jeopardy 23

Principles 24
Recognizing immediate jeopardy 24
What are the consequences? 24
Triggers for immediate jeopardy 25
Current CoPs that hold risk for immediate jeopardy 25
Adverse medication consequences 26
Immediate jeopardy example 26
Drug regimen review 27
Failure to prevent neglect 27
Nutrition and hydration 27
Infection control 28
Stabilize condition 28
Emergency preparedness 28
How to mitigate risk 29
Things you can do to put your agency a step ahead 30
What to do about neglect, abuse or other violence 30

Chapter 4: What to expect from your surveyor 33

Task 1: Pre-survey prep 33
Task 2: Entrance interview 35
Task 3: Information gathering 36
Home visits 37
Task 4: Information analysis 39
Task 5: Exit conference 39
Task 6: Statement of deficiencies 40

Chapter 5: Staff interviews with surveyors 43

Entrance interview 43
Clinical manager/supervisor interview 49
Interview with the case manager and clinical staff 52
Home visit probes 53

Chapter 6: Clinical record review 57

Number of records surveyors will request (by patient census size) 57
Record review guidelines: Tips for success..... 57

Chapter 7: Top survey targets 63

Most common survey deficiencies..... 63
CMS posts home health complaint survey results 65
Recent changes to CoPs 65
Conduct an objective assessment of your preparedness..... 67
Repeat standard-level deficiencies could prove costly 68
How penalties will be determined 68
Ways to avoid repeat survey deficiencies 68
Consequences of deficiencies are severe..... 69

Chapter 8: Target Planning, coordination & quality of care 71

Care planning a top condition-level deficiency 71
Address care coordination challenges..... 72
Ensure plan of care has necessary elements..... 72
What else must be in the clinical record?..... 73
What must the plan of care include?..... 73
Ensure you include the following on patients' plans of care.....74
How should the plan of care be updated? 74
Split treatment goals into smaller, discrete actions 75
Make sure patients create own goals..... 75
Ensure patients' plans of care are individualized 76
Components of a successful discharge..... 77
Act properly to discharge patients with cause..... 78
Guidelines define disruptive, abusive behavior 79
Improve your agency's case conferences 79
Respond quickly to missed visits..... 81
Fix your agency's visit frequency issues 81
Remote patient monitoring a growing concern..... 82
Survey results reveal patient rights as target area..... 83
Medication management/reconciliation 84

Chapter 9: Target QAPI 87

How to track QAPI data 87
Address this frequent survey target 88
QAPI CoPs are organized into five standards 88
QAPI programs must be ongoing, driven by data 89
What do agencies need to track? 89
Get ideas for where to focus your QAPI efforts 90
Three steps to set up a sound program 90
Key reports to analyze 92
Data analysis a key skill for quality managers 93
Involve employees in heading up QAPI projects 95
Tips to practice shared governance 95
Home Health QAPI Self Assessment Tool 96

Chapter 10: QAPI suggestions 103

Agency finds success with falls QAPI project 103
Use data to drive agency efforts 103
Additional strategies to reduce falls 104
Ways to assess your patients for fall risks 104
How to analyze fall risk 105
Five key tips to help prevent patients from falling 105
Agency shares tips for readmissions 106
Ways one agency improved on hospitalization 107
Key areas of focus for agencies 108
Take steps to reduce hospitalizations 108
Ways to reduce overall rehospitalization rates 109
Use technology, data to reduce readmissions 110
Pain interfering with activity 110
Specialists can guide your wound QAPI project 111
Ways to improve your wound outcomes 112
Measure wounds with accuracy, consistency 113
Compare SOC and discharge OASIS 114
How to improve patient's dyspnea? 115
Multidisciplinary team collaboration 115

Case manage respiratory conditions 116
Jog respiratory patients' memories, improve outcomes 117
Agencies identify HHCAHPS as top QAPI project 117
Agency conducts customer service calls 118
Tips to improve on HHCAHPS 118

Chapter 11: Target Emergency preparedness 131

Prepare for emergency plan surveys 132
Guidelines show what surveyors will focus efforts on 132
Learn home health survey guidance 133
Other important preparedness updates 134
CMS updates training exercise/exception guidance 135
Develop individualized emergency plans 136
Emergency prep tips — regardless of the emergency 138
Screening tool helps define patient risk in emergencies 139
Rank your agency's patients in order of priority 139
Make sure to sign up for GETS 140
Prepare your agency for a grid outage 141
How to prepare for a massive snowstorm 141
Protect your agency's workers from cold weather 142
Remind clinicians to stock their cars during snowstorms 142
A hurricane forecasted? Don't procrastinate 143
Add active shooter preparations to disaster plans 144
Be aware of cybersecurity obligations in the CoPs 145
Expert answers emergency preparedness questions 148
Perform a risk assessment — or risk citations 149

Chapter 12: Target Infection control 155

Survey guidance on infection control 155
Follow standard infection control precautions 157
Use CDC as your guide for infection control requirement 158
Tips for infection control survey prep 158
Prepare for an infection control survey 159
Focus on exception policies 160
Vaccine surveys: Where's the list? 160

© 2022 DecisionHealth, an HCPro brand

Include contingency plan in your policy 161
Surveyors share mandate checklist 161
Note differences in medical exemptions 162
Remote staff exceptions should be rare 163
Make sure contractors are vaccinated 163
Other mandate clarifications from CMS 164
Educate your agency's staff about infection control 164
Survey concerns around infection control 164
Actions to show infection control improvements 165
Create an infection manager role 166
Track infection control data the right way 166
Agencies share how they track infection control data 167
Handwashing 167
Agencies must ensure nurses keep clean nursing bags 169
Bloodborne pathogens 170
UTIs 171
Bedbugs 171

Chapter 13: Tips and tools for survey success 177

Achieve compliance 177
Prepare for upcoming surveys 177
Standards within the CoPs 179
Collect information in binders 182
Review OBQI Risk-Adjusted Outcome Report 184
Electronic record retrieval survey preparation checklist 184
Entrance interview 186
Interview 188
Record Review Guidelines 189
Home visit probes 190
Interviewing the patient/caregiver 191
Definitions and acronyms 193
Related resources 195
